THE COLLECTION	53

Lucian Ercolani, my Grandfather, founded ercol in 1920 in the heartland of English furniture making. Intent on designing and producing beautiful and honest furniture, both design and people were the cornerstones of his company from the very beginning. This remains true of the family owned, private company that continues his beliefs in the 21st Century.

Our passion for innovation in design and manufacturing is as strong today as it always has been. Our 16,000 sq.m highly sustainable factory combines the very latest technology with time-honoured craftsmanship to create a range of unique pieces, made with integrity and fit for purpose, designed by our very gifted in-house team or as part of exciting collaborations with wonderful external designers.

We are excited and privileged that the year 2020 will be the 100th anniversary of the founding of our company. We are very proud to be a company of wonderful people who are able to continue Lucian Ercolani's heritage of creating exceptional furniture with classic and timeless appeal now and for future generations.

## INFORMATION GUIDE

In the following pages, you'll find product specifications including wood finishes, dimensions and any other important information relevant to your chosen collection.

We work using solid ash, oak, tulipwood and walnut and some wood veneers where appropriate, each carefully purchased from responsibly harvested sources complying with the European Timber Regulations.

Our furniture is finished with a wood stain, the options for which are shown below and on relevant product specification pages, before a coat of lacquer is applied to protect the furniture. Please note that our Clear Matt (CM) finish seals and protects the furniture. As a result, it does not blend or conceal any of the natural variations within the timber. It will show the wood colour and grain off to its full natural beauty.

Timbers can also vary from range to range, to see the exact colour and finish of the wood, order a sample by visiting [ercol.com](http://ercol.com).

For safety reasons all cabinets over 60cm in height should be secured to a wall to ensure stability, for this reason furniture will have holes or fixings on the back.
